Hi, just going to copy the code here!  
We can discuss how to implement it on Monday if you're not sure.

```
//cursor
.closebtn1:hover {
  color: black;
}

.closebtn2:hover {
  color: black;
}

.closebtn3:hover {
  color: black;
}
```

I will just note that the CSS above is for a button so will have to be adjusted for use for photos alternative messages as well.

Daniel Powis

```
.image{
position:relative;
width:---Same size as the photo---
.image__img{
  display:block;
  width:100%;
}
.image__overlay{
  position:absolute;
  width:100%;
  height:100%;
  top:0%;
  left:0%;
  background:#808080;
  color:black;
  opacity:0;
  align-items:center;
  justify-content:center;
  display:flex;
  flex-direction:column;
}
.image_description{
  font-size:1.2em;
  margin-top:2em;
}
.image__overlay:hover{
  opacity:1;
}
<div class="image">
  

  <div class="image__overlay">
```

<p class="image\_\_description">Alt text goes here</p>  
</div>

(I know that is a lot of code, but I have triple checked and it works, we can go through it Monday whether we should use it or not)

Hello Dan.  
  
Thanks for the code.

I don't think I'm doing it right, but maybe you can demo it on Monday? After that, we can add it to the main website.  
  
I was actually thinking, we've practically got everyone's website, apart from Harrison's simple page + Abdulkabir's page. Worst case scenario, is that they don't submit their work, we will just have to leave their pages as they are.

Since you're doing the CSS, would it be better if I handover the most up to date website to you?  
And then you can demonstrate and work on the CSS freely on Monday?  
That way you can do the demo this time as well considering you've been doing the leg work for the CSS?  
  
Just in case you're happy with that plan, I've attached the most recent website for you. :)

Hi!  
I will defo demo it Monday morning to you and possibly Jay and then hopefully can borrow a working computer at work to demo it there, will keep you posted before the lesson. I have the code working already so hopefully should transfer over.  
  
I agree that we should keep their webpage as is and then just note down that in the feedback at the end.

See you Monday morning!

Daniel Powis
