I don't think we put a deadline yet for the individual webpages. You're not the only one left so don't worry so much. 😊 Also, Shafiq did say that the final product isn't the main thing we're being marked for. It's the collaboration side. If I'm right, I don't think we need a complicated and complex webpage each. Just a simple one should do the trick, I would've thought.
